Summary

Full-Stack Developer with 2 years of experience building scalable web and mobile applications. Proficient in React, Vue.js, React Native, and Python-based RESTful APIs, with a track record of delivering end-to-end features – from UI implementation to backend integration, deployment, and production support.

Experience

Full Stack Developer

Jul 2024 – Dec 2025

Divyal Technology

- Developed a dynamic calendar feature using Vue.js, enabling users to schedule, manage, and track events across the application
- Engineered complex JavaScript logic for recurring events, time zone conversions, validations, and real-time updates
- Designed and enhanced RESTful APIs in Python, including request handling, data validation, and CRUD operations
- Added searchable, filterable dropdowns and resolved CSS/UI consistency issues on Invoice Ninja
- Built and enhanced Vue.js UI modules and backend CRUD operations for PMD (Project Management Dashboard)
- Built complete modules for EMS (Event Management Service), including UI and GET/POST APIs for optimized data retrieval
- Collaborated with UX/UI designers, backend developers, and stakeholders to deliver intuitive, user-centric interfaces
- Owned end-to-end development: frontend implementation, backend integration, testing, deployment, and post-release support
- Deployed and maintained applications on Linux-based servers, handling environment setup, builds, and monitoring
- Managed Git-based version control workflows (branching, merging, pull requests) and conducted code reviews, mentoring junior developers

Front-End Developer Intern

May 2023 – Jun 2024

Railworld, Raipur

- Developed and maintained responsive web and mobile applications using React.js and React Native
- Collaborated with cross-functional teams to implement new features, supporting a 15% increase in user engagement
- Optimized application performance, achieving a 20% improvement in load times
- Integrated RESTful APIs to fetch and display dynamic data, ensuring seamless user interactions

Projects

Invoice Ninja

Divyal Technology

- Added searchable, filterable dropdown components to speed up record selection across the app
- Fixed cross-page CSS inconsistencies, improving overall UI polish and usability

PMD – Project Management Dashboard

Divyal Technology

- Built and enhanced Vue.js UI modules for project tracking and team workflows
- Implemented backend CRUD operations in Python to support dashboard data management

EMS – Event Management Service

Divyal Technology

- Built complete modules end-to-end, including UI and backend integration
- Created and modified GET/POST APIs to ensure accurate and optimized data retrieval

Education

Bachelor of Technology (B.Tech), Computer Science and Engineering

2024

Bhilai Institute of Technology, Raipur

Percentage: 81.9%

Technical Skills

- **Languages:** JavaScript, Python
- **Frontend:** React.js, Vue.js, React Native, HTML/CSS
- **Backend & Database:** RESTful API design & integration, CRUD operations, MySQL
- **Tools & Practices:** Git, Linux server deployment, code review, Agile collaboration
- **Core Strengths:** Problem-solving & analytical thinking, time management, adaptability, team collaboration
